

To guardian

Request for students health journal

- The student's health journal is a document that only authorized personnel at the school healthcare can take part of. By following up the student's health during all school years it gives important information about immunizations, hearing and eyesight tests, height and weight development and other medical information.
- The school health care wishes to get your consent to retrieve the journal from your child's previous school or Swedish child care center (BVC).
- **If your child has not attended school or BVC in Sweden, please send a copy of all your child's given immunizations (from birth up until today) translated into English or Swedish.**

Please fill in this form and send it to Skolhälsan/Sollentunahälsan AB (address below).

Kind regards, *The School nurse*

Student's name: _____ **Social security number:** _____

Present school: _____ **Class:** _____

Name of the previous school/Swedish BVC: _____

Address of the previous school/Swedish BVC:

Guardian's signature / Underskrift vårdnadshavare
